

# MARBLE MAGNETS

## MATERIALS & TOOLS

- Flat Back Marbles #30151047 - clear or clear iridescent
- Images - from magazines, or stamped/drawn on cardstock
- Tacky Glue #1360916
- Clear Gloss Varnish #77628073
- Disc Magnet #30043930
- E-6000 Glue #1368505
- Scissors
- 1" Foam Brush #10109

## INSTRUCTIONS

1) Gather your images. Cut out from magazines, stickers or stamp and color on cardstock. Remember the size of the marbles will determine the size of the image you can use. Trim down to close to marble size.

2) On the flat side of the marble, apply a thin layer of Tacky Glue.

3) Place the right side of the image onto the glue surface. Smooth out the back and let dry.

## INSTRUCTIONS (Continued)

4) Trim any excess paper from the marble. Apply a coat of clear varnish. Make sure you go a little off the edges to help seal the images. Let dry.

5) Use E-6000 glue or similar to glue a magnet to the back of the marble. Let dry. **NOTE:** Adult supervision is needed when working with E-6000 glue. Follow manufacturer's suggested use.

6) Use your marble magnets for different things like a chore chart or just to hold photos or notes up.
